

ACCESSORY

SS V-BAR

The attractive, solid standard V-Bar. 40x0°

■ Colors : Black, Silver, Blue, Red, Gold

DX PLUNGER

The worldwide standard—suitable from beginners to top pros!
Includes Teflon and metal-plated tips.

■ Colors : Black, Silver, Blue, Red, Gold, Pink

BOW CASE [RBT-1000EX]

Robust ABS shell protects your equipment from weather influences and shock-induced damage! Enough space for 2 complete recurve setups. Tie-down straps and inner pockets allow for perfect space organization!

■ Colors : Black, Silver, Blue, Red, White, Light Blue, Orange, Lime Green, Pink, (Available colors may vary)

CHEST GUARD

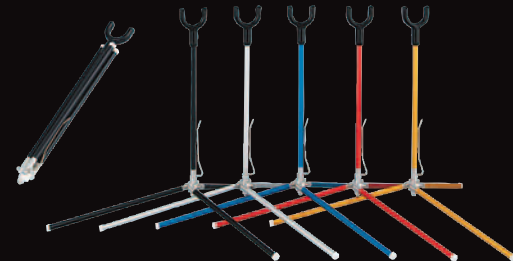

Velcro back connection and elastic strap allows adjustments for optimum fit!

■ Colors : Black, White, Red, Blue ■ Size : S, M, L, XL ■ RH / LH

FOLDING BOWSTAND

The award-winning original folding bowstand.
A long-selling favourite!

■ Colors : Black, Silver, Blue, Red, Gold

ULTIMA[®] CPX

TARGET COMPOUND SIGHT

TRIA-LOCK SYSTEM

Ultima CPX's scope rod is threaded through the windage block, offering an unprecedented level of stability and ruggedness, while preserving the outstanding light weight of the Ultima Series! The innovative new Tria-Lock system encloses the entire windage slider from three sides, keeping it perfectly aligned and without play to produce a rattle-free, zero-tolerance environment.

X-LOCK SYSTEM

Re-adjustable, zero-tolerance fit between the windage unit and sight frame. Super-slick and durable polyacetal resin guide spacers enclose the elevation rail, re-adjustable at the turn of a set screw. All parts field-adjustable and -replaceable!

Protected under US Pat. No. 7,287,335

CUTTING-EDGE TECHNOLOGY For Dependable Adjustments

Ultima CPX's windage assembly features Grade 5 Titanium alloy bolts for 2nd and 3rd axis adjustments, secured with wedge-locking NORD-LOCK® washers for absolute vibration resistance.

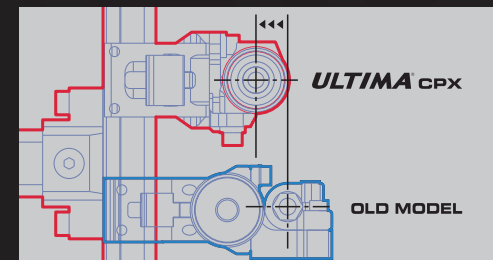

No more loose screws!

NORD-LOCK
 Bolt securing system

Keeping the scope rod close to the elevation rail – The key to stability

Shibuya's innovative Tria-Lock system keeps the scope rod approx. 1/2" closer to the elevation bar than conventional target sights. This significantly reduces moment effected on the windage unit – a significant factor in development of play and faults!

UL-CPX365-6
 Scope Sold Separately

UL-CPX520-9
 Scope Sold Separately

Models	UL-CPX 365	UL-CPX 520	UL-CPX Std

 DIOPTERS

- Super-clear, weather proof lens by Nikon – Designed to fit archer's needs!
- Magnesium Housing – up to 30% lighter than similarly sized aluminum housings!
- Cutout for rattle-proof connection to ϕ 5/16" scope rod holders – compatible with all common target sights
- Buffed, non-glare level vial (yellow color)
- Aluminum Lens Retainer Ring – available in anodized black, silver, blue, red, gold
- Fiber post attachment (sold separately) 0.029" Fiber included (red, green)

SHIBUYA 29mm Scope Set includes

- 10-32 x 20mm Grade 5 Titanium alloy stud / Shibuya Scope Cover (Splashproof)
- 10-32 x 64mm Stainless Steel Rod and hex nut / Nikon Lens Cloth
- Shibuya Dual-Color Dot Package w/ adhesive centering matrix

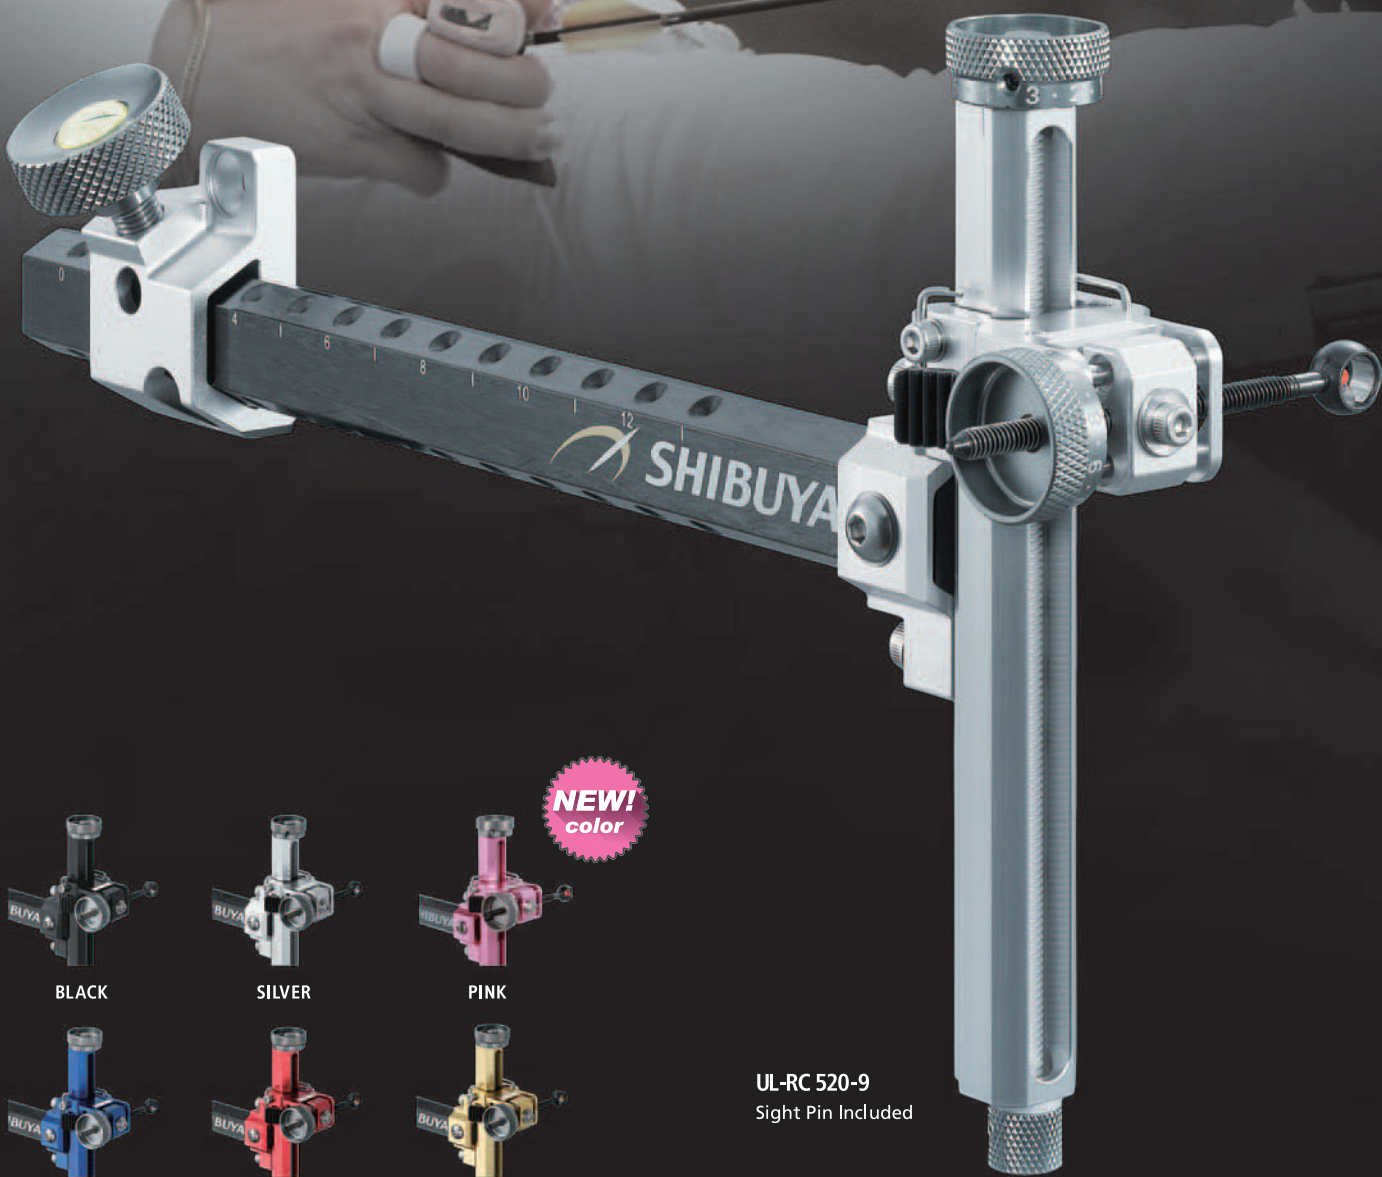

- Micro Adjustment Travel – .002" per click (windage/elevation) 20 clicks per revolution
- Integrated 2nd and 3rd axis adjustment
- Extra-large release lever for smooth, easy adjustments
- Laser-etched sight scales compatible with popular configuration software
- Field-adjustable, field-replaceable components – no need for factory repairs
- Includes soft carrying case and metric allen wrenches

UL-RC 520-9
 Sight Pin Included

Models	UL-RC 520	UL-RC Std
Extension bar	CARBON	ALUMINUM
Extension lengths	9"	
Elevation lengths	5.20"	
Weight	218g	223g
Anodized Colors	Black, Silver Blue, Red, Gold	Black, Silver

- Micro Adjustment Travel – .002" per click (windage/elevation) 20 clicks per revolution
- Serrated release lever for smooth, easy adjustments
- Laser-etched sight scales compatible with popular configuration software
- Field-adjustable, field-replaceable components – no need for factory repairs
- Includes soft carrying case and metric allen wrenches

ULTIMA[®] RC

TARGET RECURVE SIGHT

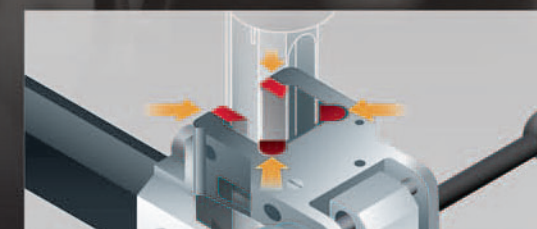

X-LOCK SYSTEM

Re-adjustable, zero-tolerance fit between the windage unit and sight frame.

Super-slick and durable polyacetal resin guide spacers enclose the elevation rail, re-adjustable at the turn of a set screw.

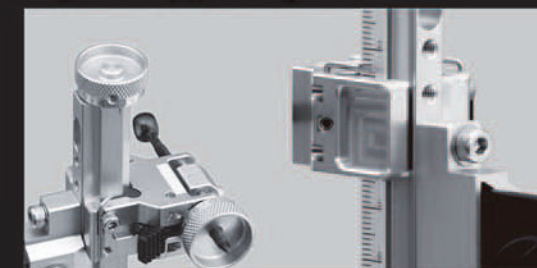

All parts field-adjustable and -replaceable!

Protected under US Pat. No. 7,287,335

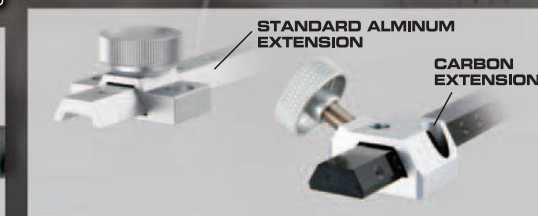

PRECISE, HASSLE-FREE ADJUSTMENTS

Ultima series sights feature a precise, ultra-smooth lever locking mechanism. Coarse adjustments are quick to make by pressing the release lever, and simply sliding the windage unit to the desired position. The micro-adjustment dial provides 0.002" of travel per click at 20 clicks per revolution. All adjustments are compatible with popular configuration software.

PRECISION MOUNTING SYSTEM

Ultima Sights offer the choice of an extra rigid carbon extension, or the affordable, precision-machined standard aluminum extension. Both options on Ultima-series sights feature a precision dovetail mount, locking down the sight securely in a repeatable position. Never worry about sight extension length or orientation again!

PROVEN SUCCESS

No other sight has helped more archers win their spots on the podium in the international target circuit than Shibuya's Ultima and Dual Click series.

Find out more about Shibuya's Shooting Staff's achievements at www.shibuya-archery.com!

ULTIMA RECURVE REST

A New Dimension Of Precision

DLC-COATED SUPPORT ARM

supreme wear resistance and friction reduction

DUAL ADJUST SYSTEM

perfect clearance: solid horizontal / vertical adjustment

DUAL MAGNET SYSTEM

Dual magnets reliably return the rest pin after each shot

- Offset Arm Construction enables use with small shaft diameters
- Precision CNC-machined parts
- Metric allen wrench and instruction sheet included
- Colors : black, silver, blue, red, gold

**Tournament proven
And still going strong!**

DUAL CLICK

TARGET RECURVE SIGHT

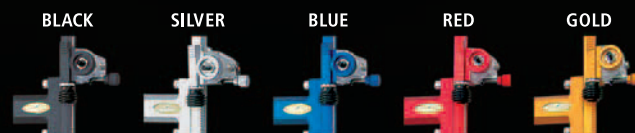

Takaharu Furukawa, JPN
London Silver Medalist
2013 Japanese Outdoor Champion

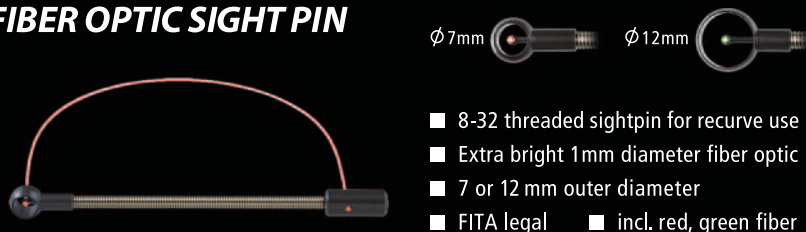

Ever since we set the standard for target archery sights with the AR-10 in 1979, no other brand of recurve sights has produced more champions or world records than Shibuya. The Dual Click line has been the sight of choice for a great number of top-ranked archers, such as the medal-winning Korean National Team!

THE CARBON ADVANTAGE

In addition to the standard aluminum extension, Dual Click line sights are available with a precision carbon composite extension. Carbon is stiffer and lighter than aluminum, and absorbs more vibrations and shock upon release!

FIBER OPTIC SIGHT PIN

- 8-32 threaded sightpin for recurve use
- Extra bright 1mm diameter fiber optic
- 7 or 12 mm outer diameter
- FITA legal ■ incl. red, green fiber

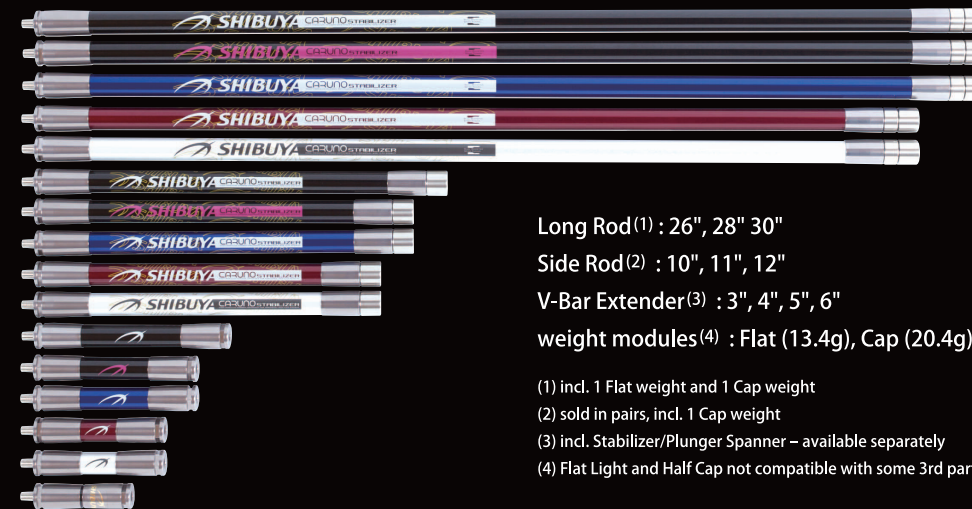

Models	DC-C	DC-S
Extension bar	CARBON	ALUMINUM
Extension lengths	9"	
Elevation lengths	5.20"	
Weight	191g	197g

ACCESSORY

CARUNO STABILIZER SYSTEM

LIGHT IS STRONG.
CARUNO makes no compromise!

Carbon pipes by
Fujikura

- Long Rod⁽¹⁾ : 26", 28", 30"
- Side Rod⁽²⁾ : 10", 11", 12"
- V-Bar Extender⁽³⁾ : 3", 4", 5", 6"
- weight modules⁽⁴⁾ : Flat (13.4g), Cap (20.4g), "Flat Light" (11.2g), Half Cap (11.7g)

- (1) incl. 1 Flat weight and 1 Cap weight
- (2) sold in pairs, incl. 1 Cap weight
- (3) incl. Stabilizer/Plunger Spanner – available separately
- (4) Flat Light and Half Cap not compatible with some 3rd party dampers or weights

Vari-Blend Carbon –balancing lightness with rigidity–

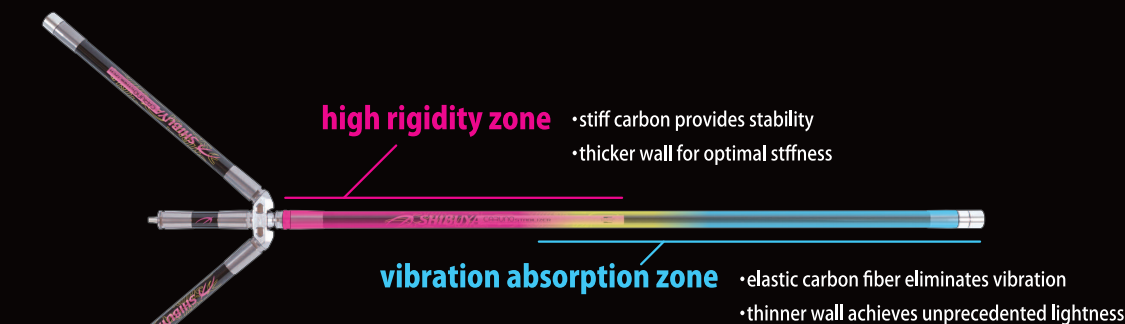

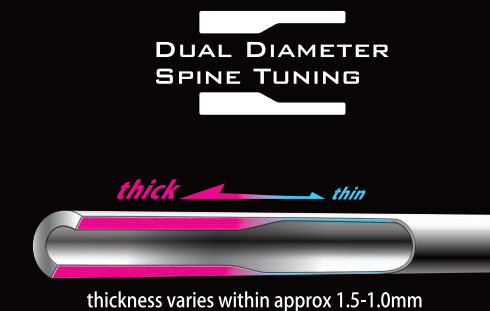

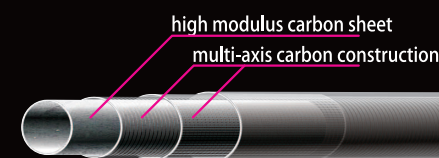

image 3 CARUNO features a unique stabilizer shaft construction, which features carbon blends of varying elastic moduli, placed strategically to maximize performance. Combined with the DDST construction, this gives CARUNO the solidity and vibration absorption properties high level archers desire. Long Rod and Side Rod employ individually optimized carbon blends, offering superior vibration absorption and stiffness, while reducing torsional rigidity for optimal shooting feeling. The V-Bar Extender shaft features high torsional rigidity and stiffness, firmly supporting V-Bar, Long Rod and Side Rods.

Spine tuning –optimized volume distribution–

CARUNO Stabilizer's Dual Diameter Spine Tuning (DDST) construction dramatically reduces the mass weight of the stabilizer rod without sacrificing its strength, by varying the inner diameter of the rod at the base and weight end.

Direct Link

The CARUNO V-Bar Extenders feature SHIBUYA's popular Direct Link System. An Aluminum "connecting rod" is inserted inside the carbon pipe, creating an incredibly strong bond between the end bushings, and offering unbeatable stiffness. Just like Shibuya's world-famous sight systems, CARUNO Stabilizers are produced in Japan to meticulous quality standards.

SHIBUYA RECURVE V-BAR CARUNO

- Ultra light: 47g (1.66oz)! Redefining Weight Distribution
Developed with and for world-class archers
- Side rod angle: 40, 45 ■ Down angle: 0
 - Color: Gunmetal ■ Includes Spanner, V-Bar bag
